

## FERRARI MASERATI SILICON VALLEY SERVICE CENTER

### ***TMC* Sport Line** ACCESSORIES PACKAGES

#### **GranTurismo Aerodynamic Package I**

- Front Bumper
- Front Spoiler
- Rear Spoiler
- Left & Right Rocker Panels
- Left & Right Rocker Protection Film GranTurismo Aerodynamic Package II
- Carbon Fiber Side View Mirror Casings
- Carbon Fiber Door Handles

#### **GranTurismo Wheels Package**

- 20" Front Neptune Design Gloss Black Rims
- 20" Rear Neptune Design Gloss Black Rims
- Gloss Black Rim Center Caps GranTurismo Carbon Fiber Interior Package
- Front & Rear Side Trim Moldings
- LH Dashboard Trim Molding
- Dashboard Trim Molding
- Center Dashboard Plate
- Shift Knob Insert
- Right & Left Door Handles

#### **GranTurismo Carbon Fiber Interior Evolution I**

- Right & Left Kick Plates
- Center Console Plate
- RH Lateral Tunnel Cover GranTurismo Carbon Fiber Interior Evolution II
- Shift Paddles Set
- Instrument Panel Additional Components
- Steering Wheel
- F1 Gearbox Plate (GranTurismo S)
- Aluminum Accelerator & Brake Pedals
- Aluminum Foot Rest

# ***MTC* Sport Line**

## ACCESSORIES PACKAGES

### **GranTurismo S Handling Package (CambioCorsa)**

- Front & Rear Brake Discs
- Front & Rear Anti Roll Bars
- Front & Rear Shock Absorbers
- Front & Rear Springs GranTurismo S Handling Package (Automatic)
- Rear Anti Roll Bar
- Front & Rear Shock Absorbers
- Front & Rear Springs

**Important: Skyhook system must be disabled for Handling Packages**

### **Quattroporte Interior Package I**

- Front and Rear Kick Plates
- Aluminum Accelerator Pedal
- Aluminum Brake Pedal Plate
- Aluminum Foot Rest
- Carbon Fiber Shift Paddles Set

### **Quattroporte Interior Package II**

- Front and Rear Trim Moldings
- Dashboard Plates
- Center Console Plate
- Rear Console Plate
- Instrument Panel

### **Contact Information:**

For additional information about the MC Sport Line packages, please contact Maserati Silicon Valley Parts Department at **(888) 649-7943** or at **[parts@ferrarisiliconvalley.com](mailto:parts@ferrarisiliconvalley.com)**.

Ferrari Maserati Beverly Hills Service Center is located at 2750 El Camino Real, Redwood City, CA 94061

## ACCESSORIES PACKAGES | DESCRIPTION

### Maserati GranTurismo Packages

**EXTERIOR:** upgrade look and performance of your GranTurismo

The aerodynamic look and performance of the GranTurismo can be enhanced with the addition of two front deflectors and a rear spoiler, developed with the aid of race track tests performed with the GranTurismo MC Concept. The new aerodynamic parts increase the downforce (coefficient of lift:  $C_z$  -30%), allowing the car to slice accurately through corners even faster.

The aerodynamic additions give the car a distinctive competition look, an effect assisted by the “dark line” on the exterior and by the black painted side-skirts which provides an even more dynamic side profile. An even sportier exterior can be achieved by combining the carbon fiber aerodynamic additions with side mirror housings and door handles in the same material. Completing the race-inspired look are aggressive Neptune design 20” wheels. Their gloss black surfaces perfectly complement the carbon fiber's dark hue.

**INTERIOR:** Transform the cabin of your GranTurismo into a race-inspired cockpit

In “MC Sport Line” interiors, carbon fiber sets the style: dashboard, door panels and rear side panels all have carbon fiber moldings, while other interior details are finished in gloss black to provide a closer match with the carbon design. The carbon fiber door has the script “MC Sport Line”. Carbon fiber also dominates the central tunnel, highlighting the brilliance of the chrome trim pieces. To give the interior an even more distinguished look, the entry package can be added to the carbon fiber clad instrument panel and longer gear shift paddles, also in the same carbon fiber. For those in search of the ultimate in racing style, a black leather steering wheel with carbon fiber rim and machined aluminum pedals with “MC” logo in red are also available.

### Maserati GranTurismo S Package

The “MC Sport Line” also provides the option of a race-bred suspension and upgraded disc brakes on GranTurismo S Automatic.

The “MC Sport Line” suspension features single-setting dampers and a firmer, more track-tuned set-up. The “MC Sport Line” suspension is combined with perforated and slotted front and rear disc brakes which help provide a more immediate braking action during sustained spirited driving. Compared to the standard units, the MC Sport Line discs are perforated around the perimeter for less fade along with 4 slots that help keep the brake pad clean, limiting loss of performance due to the build-up of brake dust and gasses caused by braking: while in the case of rain, their mechanical action helps to break up the film of water. Blind holes have been added inside and outside of the braking surface for more uniform wear of the brake pad and disc surfaces, keeping braking efficiency constant over time. The electronically controlled dampers installed on the Maserati GranTurismo S Automatic can be replaced with a fixed-setting type (spring and dampers with damping factor increased by + 8%), combined with a larger-diameter roll bar for the rear. This different setup removes the filtering effect of the electronics to give a more direct “feel” of the car’s response and reduces the load transfer (rolling angle - 8%) increasing agility and driving pleasure.

*We suggest combining the aerodynamic package with the sport suspension set-up as this combination allows both the wings and the suspensions to work more effectively to achieve the best performance in handling.*
